INSTRUCTIONS

- All outgoing USPS Mail that needs postage should be kept separate from all other mail and bear a valid University return address.
- The mail should be stacked with the address facing the same direction; larger pieces on the bottom and smaller pieces on the top. In addition, postcards should be placed on top since our mail processing equipment does not differentiate between letter-size pieces and postcards.
- Any letter-size pieces that need to be machine sealed by our mail processing equipment should be stacked with the flaps up and nested together. Larger pieces of mail and over stuffed envelopes should already be sealed prior to being metered. Failure to properly seal this type of mail could result in the contents of the mailpiece being unsecured in the envelope.
- Your mail should be bundled together by a rubberband and have the appropriate charge slip attached. Large quantities of mail that cannot be secured by a rubberband may be placed in a mail tub or mail tray with the charge slip placed on top in plain view. Campus Mail Service strongly encourages mailers to rubberband their mail to be metered. This helps in making sure that only your mail is processed on your account and no other department's mail is accidentally mixed-in with your mail.
